PACKAGED LIGHTING SOLUTIONS

Packaged Lighting Solutions Ltd – The Pinnacle, 160 Midsummer Boulevard, Milton Keynes MK9 1FF

Description

- Our **Entro** Series 6w, 12w and 18w energy-saving LED Frosted Ceiling Light is designed for domestic, commercial, and retail lighting. It is the perfect replacement the recessed single and twin CFL lights and, with a depth of only 20mm, ideal for areas with a restricted ceiling space.

Featuring an aluminium body with frosted acrylic diffuser and 2835 SMD LED Chips, this **Entro** downlight produces a better spread and output of light but uses up to 80% less energy. These lamps achieve the optimum balance between light output and longevity to deliver a long-life performance of up to 50,000 hours. The units come included with their own drivers which are to be 'choc' blocked straight onto a mains circuit. These low-profile LED downlights are available as either dimmable or non-dimmable with the option of warm white or cool white colour temperature.
